

Piomic Medical is an international oriented Start-up company, focusing on development and establishment of an innovative medical device in the international wound care market. We search for enforcement of our highly motivated clinical research team as a

Clinical Trial Associate

📍 Zürich

📅 now

🕒 80% - 100%

The Clinical Trial Associate supports the Clinical Operations team in activities across international clinical studies and reports to the Clinical Operations Leader.

YOUR RESPONSIBILITIES

- Management of operational aspects of post market clinical trials while executing a wide range of clinical trial activities from study start up to clinical study report including site selection and site initiations, co-monitoring visits, import/export licenses for materials, review of regulatory documents, logistic and administrative support, etc.
- Assist with the management of 3rd party vendors (CROs) including the supervision of deliverables and timelines
- Perform training of investigators and study nurses, research coordinators and Contract Research Associates (CRAs) with overall travel pensum of up to 40%
- Contribute to the development of trial related documents, ensure compliance with study protocols, regulatory requirements, adherence to Good Clinical Practices (GCP) and applicable Standard Operating Procedures (SOPs).
- Optimization & maintenance of electronic filing of study and general clinical operations documents (TMF)
- Assist with organizing and conducting internal and external meetings with associated communications and materials.
- Support compilation of information for scientific publications in international peer-reviewed journals and other publications, conferences, and other media as appropriate.

YOUR QUALIFICATIONS

- Bachelor's degree (or equivalent) or higher in a scientific, medical, or healthcare discipline with minimum of 2 years' experience in clinical operations. Ideally, we will have someone that has started as a CRA and has recently transitioned to a clinical operations manager.
- Coming from a Medical Device/Pharma/Biotech or CRO Background
- Excellent knowledge of Good Clinical Practice (ICH-GCP) guidelines
- Strong computer skills including proficiency in Microsoft (MS)-based applications (e.g., Word, Excel, and PowerPoint)
- Fluency in English (any other language is a plus)
- Experience/Interest in wound care sector
- High degree of self-organization and motivation, proactive problem solver
- Positive attitude, ability to connect to a wide range of personalities

WE OFFER

- An interesting role in a highly motivated and dedicated team
- A friendly and dynamic work environment
