

Piomic Medical is an international oriented Start-up company, focusing on development and establishment of an innovative medical device in the international wound care market. We search for enforcement of our highly motivated clinical research team as a

Junior Clinical and Medical Affairs Manager

📍 Zürich

📅 now

🕒 80% - 100%

The Junior Clinical and Medical Affairs Manager/Medical Science Liaison Manager supports the Clinical Operations team in the implementation and oversight of European Post-market and Investigator Initiated Trials (IITs) and reports to the Clinical Operations Leader.

YOUR RESPONSIBILITIES

- The primary responsibility will be to interact with influential healthcare providers (HCPs) in the wound care field while establishing and maintaining peer to peer relationships with leading physicians.
- Management of operational aspects of post market clinical trials while executing a wide range of clinical trial activities from study start up to clinical study report including site selection and site initiations, co-monitoring visits, import/export licenses for materials, review of regulatory documents, logistic and administrative support, etc.
- Assist with the management of 3rd party vendors (CROs) including the supervision of deliverables and timelines.
- Perform training of investigators and study nurses, research coordinators and Contract Research Associates (CRAs) with overall travel pensum of up to 60%.
- Contribute to the development of trial related documents, ensure compliance with study protocols, regulatory requirements, adherence to Good Clinical Practices (GCP) and applicable Standard Operating Procedures (SOPs).
- Assist with organizing and conducting internal and external meetings with associated communications and materials.

- Support compilation of information for scientific publications in international peer-reviewed journals and other publications, conferences, and other media as appropriate.

YOUR QUALIFICATIONS

- Bachelor's degree (or equivalent) or higher in a scientific, medical, or healthcare discipline with a minimum of 2 years' experience in clinical operations and/or Medical Advisor. Ideally, we will have someone that has started as a CRA and has recently transitioned to a clinical operations manager or Medical Science Liaison Manager.
- Coming from a Medical Device/Pharma/Biotech or CRO Background
- Excellent communication skills paired with an outgoing nature and networking capabilities with a wide range of personalities.
- Strong computer skills including proficiency in Microsoft (MS)-based applications (e.g., Word, Excel, and PowerPoint)
- Fluency in English (any other language is a plus)
- Experience in wound care sector
- High degree of self-organization and motivation, proactive problem solver

WE OFFER

- An interesting role in a highly motivated and dedicated team
- A friendly and dynamic work environment
- Modern open workspace in Zürich downtown close to HB
- Working within an ambitious team where your input is essential and valued
- Salary at market level
